SUMMARY

Informatics Engineering graduate with a strong passion and skills for turning raw data into meaningful business decisions. Proficient in SQL, Excel, Python, Power BI, and Tableau. With hands-on experience in customer analytics, sales performance and operational efficiency analysis. Eager to bring both technical foundation and business-minded thinking to a data-driven team.

PROJECT EXPERIENCE

FNP (*Ferns & Petals*) Sales & Revenue Analysis, Github

January 2026

- Analyzed **1,000 orders** and **\$3.5M in revenue** across **7 product categories** and **8 occasions** using **Excel Power Query, Power Pivot, and Pivot Tables**, identifying that Anniversary and Raksha Bandhan alone drive the majority of total revenue.
- Uncovered a severe seasonal revenue concentration **with 80%+ dependency** on three peak months (Feb, Aug, Nov), **including a -73% Q2 revenue collapse**, signaling critical off-peak demand failure across the business calendar.
- Recommendation 5 targeted business strategies (Corporate Subscription Model, Hero Category scaling, and Golden Hour operational optimization) projected to stabilize cash flow and increase order frequency in underperforming periods and cities.

Customer Segmentation & Retention Analysis, Github

January 2026

- **Performed cohort analysis & RFM segmentation** on 20,000+ transactions, **revealing 95% first-month churn** and identifying that **top 8% of customers** (Champions) drive **16%** of total revenue.
- Uncovered a critical customer acquisition collapse (**from 265 to 1 new customer/month**), signaling systemic retention failure across the customer lifecycle.
- Designed **6 targeted retention strategies** (VIP loyalty program, reactivation campaigns) projected to recover revenue **from the 60% declining segments** currently **contributing 53% of total revenue**.

Walmart Branch Sales Performance, Github

October 2025

- **Analyzed 9,599 transactions** across 100 branches (2019–2023) using SQL, identifying **order volume decline (-39.5%)** as the root cause of revenue loss while AOV remained stable — isolating the problem to demand, not pricing.
- **Mapped regional performance**, finding DFW Metroplex accounts for **39.4% of revenue** while Central Texas showed the highest growth potential (**29.8% CAGR**) — informing resource allocation strategy.
- **Recommended Q4 acceleration strategy** leveraging **227%** historical seasonal growth and digital payment adoption, **which drove 84% of 2023 orders**.

Expert System for Early Kidney Disease Diagnosis (*Thesis, PHP, MySQL, Forward Chaining*), Github

December 2024 – January 2025

- **Built a web-based diagnostic tool** capable of identifying **6 kidney conditions** from **20+ symptoms** using **Forward Chaining inference** — achieving 100% accuracy against expert manual diagnoses.
- **Engineered a rule-based knowledge base** with **18+ production rules and decision trees**, enabling early disease detection through automated symptom-to-diagnosis mapping.
- **Delivered full-stack application** (CodeIgniter MVC, admin dashboard, user login, diagnosis history) **with complete documentation** — tested via Black Box & White Box methods ensuring reliable UI/UX.

WORK EXPERIENCE

Store & Food Service Associate, Bogor <i>Hayfa Grocery Store & Yasaka Fried Chicken</i>	April 2022 – Present
- Assisted in daily operations of a family-owned grocery store and fried chicken outlet, serving around 5–10 customers per day. - Handled cashier transactions, recorded daily sales, and supported basic bookkeeping. - Monitored stock levels, restocked products, and coordinated with suppliers to maintain product availability.	

LANGUAGES AND SKILLS

- Technical Skills:** SQL (PostgreSQL, MySQL), Python (Pandas, Matplotlib, Seaborn), data analysis, data processing, data cleaning, data validation, Microsoft Excel, Microsoft Word, Microsoft PowerPoint
- Data Visualization:** Power BI, Tableau
- Soft Skills:** Analytical thinking, problem solving, communication, teamwork, attention to detail, proactive mindset, adaptability.
- Languages:** Bahasa Indonesia (Native), English (Intermediate)

CERTIFICATIONS

Advanced SQL Certificate <i>HackerRank</i>	October 2025
Completed a Data Analysis Bootcamp focusing on Excel <i>DQLab</i>	June 2024
Data Analytics <i>Revou</i>	April 2024

EDUCATION

Pamulang University, South Tangerang <i>Bachelor of Computer Science (Informatics Engineering)</i>	July 2020 – March 2025
Cumulative: GPA 3.61/4.00; Honors: Cum Laude	

COMMUNITY SERVICE EXPERIENCE

Volunteer Instructor – Microsoft Excel Basics <i>University Community Service Program</i>	June 2023
- Developed and delivered a foundational Microsoft Excel workshop for junior high school students. - Instructed learners in foundational spreadsheet operations, introductory data formulas, and structured data management to reinforce analytical proficiency. - Assisted students during hands-on practice and responded to questions - Conveyed complex technical concepts in a clear and accessible manner.
