SUMMARY

Informatics Engineering graduate (GPA 3.61, Cum Laude) with hands-on experience in customer analytics, sales performance analysis across retail and e-commerce domains. Skilled in translating complex datasets into clear, actionable business recommendations using SQL, Python, Excel, Power BI, and Tableau. Proven ability to identify revenue patterns, customer behavior trends, and operational gaps through structured data analysis.

PROJECT EXPERIENCE

FNP (*Ferns & Petals*) Sales & Revenue Analysis | [Github](#)

January 2026

- Analyzed **1,000 orders** and **\$3.5M in revenue** across **7 product categories** and **8 occasions** using **Excel Power Query, Power Pivot, and Pivot Tables**, identifying that Anniversary and Raksha Bandhan alone drive the majority of total revenue.
- Uncovered a severe seasonal revenue concentration **with 80%+ dependency** on three peak months (Feb, Aug, Nov), **including a -73% Q2 revenue collapse**, signaling critical off-peak demand failure across the business calendar.
- Recommendation 5 targeted business strategies (Corporate Subscription Model, Hero Category scaling, and Golden Hour operational optimization) projected to stabilize cash flow and increase order frequency in underperforming periods and cities.

Customer Segmentation & Retention Analysis | [Github](#)

January 2026

- **Performed cohort analysis & RFM segmentation** on 20,000+ transactions, **revealing 95% first-month churn** and identifying that **top 8% of customers** (Champions) drive **16%** of total revenue.
- Uncovered a critical customer acquisition collapse (**from 265 to 1 new customer/month**), signaling systemic retention failure across the customer lifecycle.
- Designed **6 targeted retention strategies** (VIP loyalty program, reactivation campaigns) projected to recover revenue **from the 60% declining segments** currently **contributing 53% of total revenue**.

Walmart Branch Sales Performance | [Github](#)

October 2025

- **Analyzed 9,599 transactions** across 100 branches (2019–2023) using SQL, identifying **order volume decline (-39.5%)** as the root cause of revenue loss while AOV remained stable — isolating the problem to demand, not pricing.
- **Mapped regional performance**, finding DFW Metroplex accounts for **39.4% of revenue** while Central Texas showed the highest growth potential (**29.8% CAGR**) — informing resource allocation strategy.
- **Recommended Q4 acceleration strategy** leveraging **227%** historical seasonal growth and digital payment adoption, **which drove 84% of 2023 orders**.

Uber Ride Data Analysis | [Github](#)

Jun 2025

- **Analyzed 148,000+ ride bookings** using SQL, identifying **38% funnel drop-off** with driver cancellations (18%) as the primary operational issue.
- Built LTV-based customer segmentation revealing top-tier users **generate 50.9% of total revenue (\$26.3M)**, recommending VIP loyalty program to protect core revenue.
- Identified **49.46% churn within 2024 cohort** and proposed reactivation campaign strategy to recover nearly half the lost customer base.

WORK EXPERIENCE

Store & Cashier Staff, Bogor

April 2022 – June 2023

Hayfa Grocery Store & Yasaka Fried Chicken

- Assisted in daily operations of a family-owned grocery store and fried chicken outlet, **serving around 5 to 10 customers per day**.
- Handled cashier transactions, recorded daily sales, and supported basic bookkeeping.
- Monitored stock levels, restocked products, and coordinated with suppliers to maintain product availability.

LANGUAGES AND SKILLS

- **Technical Skills:** SQL (PostgreSQL, MySQL), Microsoft Excel (formula, power query, power pivot), Python (Pandas, Matplotlib, Seaborn), data analysis, data processing, data cleaning, data validation
- **Data Visualization:** Power BI, Tableau
- **Soft Skills:** Analytical thinking, problem solving, communication, teamwork, attention to detail, adaptability
- **Languages:** Bahasa Indonesia (Native), English (Intermediate)

Advanced SQL Certificate

October 2025

HackerRank | [Link](#)

Completed a Data Analysis Bootcamp focusing on Excel

June 2024

DQLab | [Link](#)

EDUCATION

Pamulang University, South Tangerang

September 2020 – March 2025

Bachelor of Computer Science (Informatics Engineering)

- Cumulative: GPA 3.61/4.00; Honors: Cum Laude

COMMUNITY SERVICE EXPERIENCE

Volunteer Instructor – Microsoft Excel Basics

June 2023

University Community Service Program

- Developed and delivered a foundational Microsoft Excel workshop for junior high school students.
- Instructed learners in foundational spreadsheet operations, introductory data formulas, and structured data management to reinforce analytical proficiency.
- Assisted students during hands-on practice and responded to questions
- Conveyed complex technical concepts in a clear and accessible manner.
